ABSTRACT

SOLISA is a vibrant cryptocurrency token built on the Solana blockchain, dedicated to fostering inclusivity, community, and innovation within the NFT Metaverse and gaming sectors. This whitepaper outlines Solisa's mission to bridge communities, empower creators, and drive positive change in these rapidly evolving industries.

SOLISA Token is a new Digital Ecosystem for the modern world. Its mission is to disrupt traditional forms of financial tools which provide liquidity to the broader economy.

We believe that the power of finance should be in the hands of the many, not the few, and that technology should be optimized in the best interest of human beings, to work for us and not the other way around.

Today, large corporations earn billions of dollars each year by leveraging the value of our collective earnings, which they risk by investing in ventures large and small, for the benefit of the few, not the many.

This risk, which many believed to have been isolated to those making the decisions of what to invest in, was revealed in 2009 to be placed back on the very people whose assets were being used to assume those positions in the first place, without authority or governance.

The goal of the Solisa ecosystem is to create an independent community which self-finances, and self-governs.

However, to get there we must first develop and maintain a centralized organization which builds the tools necessary to allow for a fully functional DAO (Decentralized autonomous organization) down the road.

PROJECT INFO

In recent years, the NFT Metaverse and gaming sectors have witnessed exponential growth, fueled by technological advancements and the rise of blockchain technology. However, amidst this growth, there remains a need for platforms and tokens that prioritize inclusivity, community engagement, and sustainability. Solisa emerges as a solution, offering a beacon of light in these dynamic landscapes.

In the near future , we are building a game in our own world, where players can interact and play-to-earn more token.

This is a Community Project.

Every Project and marketing Proposal will be voted by the Community on our Telegram Channel through a Poll Vote.

Solisa Token was Created in the Solana network (SOL)to re-shape the crypto Space. The Rich have control the inflow of money for so Long , now it's time for the people to have control over the financial system.

Be an Early Bird .

Everyone has the right to engage in fair trade, without restriction. This is our belief.

SOLISA mission is to put the power of decentralized finance into the hands of every individual in all walks of life so that each and every one of us get access to the riches and rewards of this revolutionized financial system!

We reward users that contribute to the Solisa Ecosystem.

We welcome creators, members and anyone that wants to join the movement.

The future is here.

TOOLS OF THE FUTURE

We believe in free markets, however we also realize that the vision of a grand world through capitalism has eroded due to inherent weaknesses created by human involvement. The beauty of code is that you are able to enforce rules without fear of manipulation or corruption.

That is why our First Tech is Creating an evolutionary Smart Contract on Solana network (SOL) that can reward Holders with passive income.

Enjoy passive rewards which are automatically sent to your wallet. Buy and hold as you watch your wallet Grow strong.

Solisa will gives smart investors a second opportunity to earn revenue. Holders will get privilege invitations to Solisa NFTs in their upcoming Initial NFT Offering event!

In time, as projected in our road map, we will have a vibrant ecosystem filled with the latest in DeFi features and functions, including cross-chain swaps, farming, staking, additional trading pairs, and NFTs. We anticipate growing to include designs and functions still yet to be discovered that can take full advantage of blockchain and smart contract Technology.

DECENTRALIZATION

Solisa is a Decentralized platform that create leading financial tools and reward holders with Utility.

One of the largest problems that looms over blockchain projects is their inability to actually create a decentralized environment which is described as one of the core strengths of this emerging technology.

There is a strong narrative that the decentralized nature of a cryptocurrency stems from the nodes (or miners) that are live, securing the network.

This conveniently excludes a growing lack of decentralization when it comes to actual ownership of coins and tokens. If one individual or centralized group has too much token ownership, especially in a fixed supply, or worse a deflationary asset, that asset becomes susceptible to attacks and manipulation and this only serves to weaken the ecosystem which is designed to source its strength through the very nature of decentralization.

TOKENOMICS

- Total supply: 1,000,000,000

- 50% Burned at launch

5% Marketing Wallet

2% Team Wallet (Locked)

Circulation Supply : 465,000,000

- 0% Tax – Buying / selling

Liquidity Pool – Locked Forever

Providing support to the project in the form of pooled resources allows us to maintain a healthy chart from a technical perspective which will help the overall steady growth of the project. We have hired a team of professional tier one market makers to strategically create buy/sell walls so that the price action is consistently moving in an upwards and stable pattern.

ROADMAP

PHASE I

Deploy Solisa Token Contract

Launch Social Media

Launch Telegram English

Launch Website

Whitepaper V1.0

PHASE II

Listing On Solana Network

Soft Marketing Campaign

1000 Holders

Audit & KYC

Community Giveaway

PHASE III

10000 Community member

Website 2.0

CMC & CG Listing

Partnership with Crypto Capital Fund

Advertising in Major Coin Listing Sites

PHASE IV

5000 Holders

Paid Influencer Partnership

Hard Marketing Campaign

Community Giveaway

DEX Listing

PHASE V

Building Discord Community

NFT Marketing Campaign

NFT Drop

NFT income to Buy Back Token

FUTURE PLAN

SolisSwap / Staking

Solis Wallet

Solis Gaming World / P2E

SOLISWORLD METaverse

DECENTRALIZED BUSINESS MODEL

As stated in the first section of this document, our aim is to provide tools which enhance the ability to create a more fair playing field when it comes to finance.

To that end, it is our ultimate goal to evolve this network into a DAO (decentralized autonomous organization). We will do this in a series of phases, in which the central authority will, piece by piece, yield that authority over to a more decentralized governing body, which shall consist of Solisa token holders at large. This will enable the ecosystem to evolve relative to the best interests of those who actively participate in its growth.

Resources such as Solisa core wallets shall be accessible to a foundation, whose members shall be voted on by stakeholders. In this delegated system, we believe the true sense of democracy shall allow Solisa Token to grow and evolve to support the interests of the many, not the few.
